

Balsa, Elapor, CL, Electric, RC Airplane Kits for Sale. As Listed OBO

Contact: fowlowd@yahoo.com

These are "new in the box" balsa wood kits (with the exception of the E Flight kits which are made of elapor foam and are "ready to fly". Just add a battery and bind to your transmitter and fly). Some of the kits date back to 1960.

There are also some vintage engines, .10 to .60, 2 stroke and 4 stroke. Please contact me for a list. I also have several 1970s era RC rigs (transmitters, receivers and servos) at \$10 each. Please contact me for brand availability.

Please contact David Fowlow at fowlowd@yahoo.com. Open to offers on any and all. Bulk discounts as well.
